

TikTok Content Posting Audit — Demo Worksheet

Bolt · Post-to-TikTok UI · One continuous screen recording (4–6 min)

UI: bolt tiktok-post --demo **Live later:** bolt tiktok-post --live **Sheet:** Docs/guides/TIKTOK_AUDIT_DEMO_PRINTABLE.html

Reviewers care about the checklist, not cinematic quality. Label requirements on screen. Do not say “auto-post my personal account.”

Before filming: Privacy Policy + Terms live on your public website · App name/icon match portal · Only request scopes you demo · Sandbox/test TikTok account ready · Domain in video = Website URL in TT4D.

PREP (CHECK OFF)

☐	Public site URL has Privacy + Terms (no menu dig)
☐	TT4D app: Content Posting + Direct Post enabled
☐	Scopes match video (drop unused products)
☐	One original clip in media/vertical_clips/
☐	bolt tiktok-post --demo loads Post UI
☐	Screen record 1080p (Loom / QuickTime / OBS)
☐	Big text labels ready (Keynote/Notes overlay OK)

FORM COPY (PASTE INTO TT4D)

What the app does
Bolt is a creator tool for original gameplay highlights. Creators review clips, edit captions, and publish to TikTok with full control over privacy, interactions, and commercial content disclosure.
How Content Posting is used
After OAuth, creators open Post to TikTok, which loads creator_info, requires manual privacy selection, interactions off by default, commercial disclosure per guidelines, legal consent, then publishes and polls status.

SHOT LIST — FILM IN ORDER

#	Time	What to show	On-screen label	Done
0	5s	Title card: Bolt · original gameplay → review → Post to TikTok	Creator tool · user-controlled publish	☐
1	15s	Open site/app domain that matches portal Website URL → Post UI	App surface = Website URL	☐
2	20s	Login / Connect TikTok if Login Kit is in scope (else skip + remove product)	Login Kit (if requested)	☐
3	20s	Pick original clip from list · show it is your content	Original creator content	☐
4	20s	Show nickname / @handle loaded from creator_info	1a creator nickname	☐
5	25s	Play preview · edit title/hashtag	5a preview · 5b editable caption	☐
6	30s	Privacy dropdown starts blank · user selects an option	2b no default privacy	☐
7	25s	Comment/Duet/Stitch all unchecked · enable Comment only	2c interactions off by default	☐
8a	30s	Commercial toggle ON (was off) · Post stays blocked until brand option	3a commercial off by default	☐
8b	20s	Check Your brand → “Promotional content” prompt	3a Your brand label	☐
8c	30s	Check Branded content → “Paid partnership” · Only me disabled	3b branded ≠ private	☐
8d	15s	Hover Only me / show: “Branded content visibility cannot be set to private.”	3b hover text	☐
9	30s	Consent text (Music; + Branded Policy if branded) · check box · Post	5c explicit consent	☐
10	25s	“May take a few minutes...” · status Processing → success	5d + 5e status	☐
11	10s	Close card: user always reviews · scopes demoed	video.publish (+ others if shown)	☐

UX REQUIREMENT MATRIX (MUST APPEAR IN VIDEO)

ID	Rule	Where in Bolt UI	✓
1a	Show creator nickname	Top of export card	☐
1b	Block when creator cannot post	Red banner + disabled Post	☐
1c	Honor max_video_post_duration_sec	Hint under privacy	☐
2a	Editable title	Caption textarea	☐
2b	Privacy from creator_info · no default	Dropdown “Select privacy...”	☐
2c	Interactions off by default · grey if disabled	Three checkboxes	☐
3a	Commercial off by default · Your brand / Branded	Toggle + options	☐
3b	Branded content cannot be Only me	Option disabled + message	☐
4	Legal text switches for branded	Consent paragraph	☐
5a–e	Preview · no watermark · consent · processing notice · status	Left preview + bottom status	☐

Write on this. Stick it next to your monitor.

COMMANDS

```
# Film without token (UX dry-run publish) bolt tiktok-post --demo # After TikTok approves + bolt tiktok_token  
bolt tiktok-post --live # Manual peak posts until API works bolt queue next --open bolt queue mark-posted <id>
```

THIS TAKE — NOTES

Date: _____ Take #: _____ Clip used: _____

Account shown (@): _____ Mode: ☐ demo ☐ live

What looked wrong / redo notes:

Prior denial reason (if any) — must address in video:

DO / DON'T (INTENDED USE)

Do say / show

- Original gameplay highlights
- Creator reviews before every post
- Full privacy / commercial control
- Tool for creators (wide audience framing)

Don't

- “Posts for my one account automatically”
- Terminal-only postnow as the whole demo
- Default privacy pre-selected
- Watermark / promo branding on the video
- Request scopes you never show

AFTER RECORDING

- | | |
|--------------------------|---|
| ☐ | Video ≤ 50 MB (TikTok portal limit per file) |
| ☐ | Every selected product/scope appears once |
| ☐ | Shot 8c–8d branded + private rule is visible |
| ☐ | Written answers match what the video shows |
| ☐ | Upload demo + (optional) UX PDF mockups |
| ☐ | Submit audit · keep manual post + mark-posted meanwhile |

VOICEOVER (OPTIONAL — OR USE CAPTIONS ONLY)

“Bolt helps creators post original gameplay highlights.
The creator connects TikTok, previews the clip, edits the caption,
chooses privacy with no default, enables interactions manually,
optionally discloses commercial content with branded-content privacy rules,
agrees to TikTok’s terms, then posts.
We only call the publish API after that consent.”

MINIMAL UI ALREADY IN BOLT

- Core/modules/TikTok_Post_UI.py — export screen (this demo)
- Core/modules/TikTok_Publisher.py — creator_info + brand toggles + publish
- bolt tiktok-post — local server @ http://127.0.0.1:8787
